COSMETIC AESTHETICS

Notice: Due to recent updates from the Australian TGA, our price list may appear limited, and certain treatments may be presented differently.

Unfortunately, we're unable to provide specific prices for some of our treatments. However, we can offer you a complimentary consultation to address a range of concerns, including fine lines, wrinkles, facial volume loss, contouring, skin hydration, and revitalisation.

During your consultation, we'll discuss your concerns, provide transparent pricing, detail any associated risks, and craft a tailored treatment plan aligned with your aesthetic goals.

Please also note we are unable to discuss brand names, pricing, or these treatments over the phone or on our social media platforms.

Please contact us to book your consultation via phone on 02 9145 5111 or via our online booking system.

COSMETIC AESTHETICS

BIO-REMODELLING SKIN BOOSTER

A new category of cosmetic treatment has recently been launched in Australia that is a totally unique approach to improving collagen and elastin production in the skin.

The first of its kind, this is a new and revolutionary treatment that is injected just beneath the skin. Made with patented NAHYCO® technology, this treatment is made from a unique HA gel which has a prolonged stimulating activity on the skin. When injected, it stimulates the skin cell receptors to counteract skin laxity while also improving and restoring firmness to the skin.

REJURAN

Rejuran® works by activating the skin’s natural regenerative abilities, boosting collagen production and addressing concerns such as wrinkles, scars, enlarged pores, redness, and pigmentation. The result is a refreshed and rejuvenated complexion. A series of treatments can enhance skin texture, firmness, and elasticity. By stimulating the growth and renewal of the extracellular matrix, Rejuran® also strengthens the skin’s barrier function, reducing redness and inflammation. This makes it particularly beneficial for those with conditions such as rosacea and melasma.

Rejuran Classic is a versatile option for overall skin rejuvenation, improving both collagen and elastin production to enhance skin texture, firmness, and elasticity.

Rejuran I is specially formulated for the delicate eye area, helping to brighten dark circles and improve crepey skin for a smoother, more youthful appearance.

Rejuran Scar is an excellent treatment for all types of scarring, including acne scars. It works to improve the overall quality of the skin while reducing the appearance of scars.

COLLAGEN STIMULATION

The latest TGA and FDA-approved collagen stimulator to arrive from Korea, this cutting-edge injectable treatment is designed to revitalise the skin by stimulating natural collagen production from within. It contains polycaprolactone (PCL), a biodegradable and biocompatible polymer that has been safely utilised in medical applications for many years. PCL works as a long-lasting collagen stimulator, penetrating beneath the skin’s surface to restore structure, improve elasticity, and boost hydration levels. Unlike traditional fillers, this treatment targets the root causes of ageing, reducing fine lines and wrinkles while enhancing overall skin texture and firmness. The result is a naturally youthful, radiant complexion that improves progressively over time.

For optimal outcomes, two treatment sessions are recommended, spaced 12 weeks apart. This schedule ensures the PCL has the time needed to gradually rebuild the skin’s collagen reserves, delivering long-lasting and natural-looking results. Developed in Korea, a leader in advanced skincare innovation, this collagen stimulator represents the forefront of anti-ageing technology. Ideal for those seeking a minimally invasive yet highly effective treatment, it offers a glowing, refreshed appearance with minimal downtime, making it a popular choice for restoring confidence and skin vitality.
